element

Tokujin Yoshioka

DESCRIPTION

The heart of the Element project lies in the single central support, a metal parallelepiped that is reminiscent in its form of the minerals and quartzes found in nature, positioned at a slant, teetering between the base and the top as though almost challenging the laws of gravity.

FEATURES

- Disassembling tables with steel structure, legs in reinforced steel tube covered with aluminium sheets, base made of metal sheets and steel tubes. Tops in: raw iron finished to wax, MDF lacquered white, black or red, wood veneer in oak or walnut.

DIMENSIONS

- L17.72" W17.72" D16.93" L17.72" W17.72" D22.05"
