

MINIMA

Form Stacking

Simon Legald

DESCRIPTION

A flawlessly cohesive design and visionary variations characterize the bestselling Form collection, which was introduced in 2014 and is being continually expanded. The stacking chair has a light and slim silhouette and gives Form a new level of flexibility. The chairs are easy to put aside when they are not in use, making it possible to transform interior furnishings and store larger amounts of spare chairs.

The Form stacking chairs are easy to stack from the front by sliding one chair over another. The design of the chair base also makes it possible to connect the chairs to each other in rows. The stacking base is available for both the Form chair and the Form barstool.

The specially-developed assembly principle permits a wide range of combination options, in which the various Form models, chair, armchair and barstool, can be given different expressions, all according to the choice of base, color and upholstery. With a dazzling number of over 40,000 possible combinations, Form can be customized to fit exactly the style and mood that you want to create.

DIMENSIONS

23"W x 20.5"D x 31.5"H x 17.3"SH
