Melt

Tom Dixon

DESCRIPTION

With Melt, our experiments in the technologically advanced field of vacuum metallisation takes on a new twist. MELT Gold is a distorted lighting globe born from our collaboration with Swedish radical design collective FRONT. The light bouncing and reflecting around the uneven surfaces creates a dramatic melting hot blown glass effect. MELT is translucent when on and mirror finish when off. Its internal luminosity is visible in full daylight.

DIMENSIONS

Mini D30" x 27" Regular D50"

FEATURES

- can be hung individually or in multiples using the Pendant System
- available in gold, silver, and copper
