# 20.Venti Desk

967Arch

## **DESCRIPTION**

This office system 20.VENTI features a linear iconic design typical of MDF Italia's "dna".

A reflection on the desk, the archetypal workstation, proposes to create an office atmosphere in a contemporary key. The contrast between full and empty volumes, the carefully studied combination of various finishes and the cables built into the bearing frame define an renewed proposal for office furnishings.

The technical challenge starts from the use of a slender frame generated by a 20x20 profile, a feature that perfectly merges with MDF Italia's other table and storage collections.

The collection 20.VENTI includes both individual tables and double workstations, which can be aggregated, and a wide selection of screens and accessories.

Designed by 967Arch for MDF Italia to offer an extensive choice of dimensions and finishes for working areas, management offices and residential settings where tables for nomadic technological work are becoming a common trait.

Further to the single desk and workstation two users, a new workstation four users and a flex workstation for shared working space – with customizable dimensions according to the needs – have been integrated into the collection. In addition, the new 110 cm high workstation has also been integrated: an ideal solution for quick and standing meetings, to be held in shared and less formal spaces than meeting rooms.

## **FEATURES**
