

MINIMA

Aledin Dec

Alberto & Francesco Meda

DESCRIPTION

Aledin is a LED task lamp available in two different versions, Tec and Dec, whose distinctive element is the diffuser. Aledin Dec is defined by the faceted decoration of its cone-shaped diffuser. On this model, the luminous beam throws a wider and more atmospheric light which well lends itself to residential applications. The two articulating arms in polycarbonate, which constitute the structure of both models, are characterized by two aluminium rods endowed with a conductivity function. In class 3, this lighting fixture has a high-performing luminosity in the area of 600 lm and enables considerable savings in energy consumption thanks to its latest generation 5.6 W LED lamp bulbs.

FEATURES

- LED bulb
- available in Amber, Crystal, Smoke, Blue, or Green

DIMENSIONS

Ø8.3" x 18.9"-44.5"H
