Berlin

Christophe Pillet

DESCRIPTION

Christophe Pillet designed Berlin, an object that calls into question the common understanding of the ceiling light, turning its traditional discreet character upside down to transform it into an elegant and decorative feature.

Available as a ceiling light or wall light, Berlin takes the form of a thick metal ring with a slender profile enclosing a disc of wire mesh glass inside it. The anodized brass finish recalls echoes of Art Deco, given a contemporary update in the shapes, and in the use of LED as the light source.
