# Boteco

Marcio Kogan / Studio Mk27 Design

## **DESCRIPTION**

The signature style and architectural language of Studio mk27 are clearly visible in the design of Boteco, which plays with volumes by layering, removing and adding.

With its strong identity, the Boteco family of sideboards and coffee tables fully expresses the approach taken by Kogan, who considers the planning phase of architecture, interiors and design as "part of a single process in which scale is the only difference, and where the borders separating each territory are blurred".

Closed spaces and open compartments define the look of the Boteco sideboards, in a carefully planned juxtaposition of materials and finishes.

## **FEATURES**
