Carson Cabinet

Rodolfo Dordoni

DESCRIPTION

The collection of Carson storage units has a minimalist, modern design aesthetic expressed through the combination of luxurious materials.

The resulting visual and tactile impact is astonishing: the stark nobility of bronzed metal and the timeless allure of marble contrast with the poetic substance of Sucupira wood and ebony.

The structure is MDF with a Sucupira wood veneer in the color Mink, or open-pore lacquered ebony. The sides of the containers stand on the floor and are made of satin-polished metal in the color Bronze. The tops are available in Bardiglio Nuvolato marble or Calacatta marble, both of which fit flush into the structure. Carson storage units are available in various configurations serving different purposes and finding their ideal location in different rooms in the home: from the entrance hall to the living room. The rear of all the items is also finished flawlessly so they can also be used as room dividers.
