Colombo

Joe Colombo

DESCRIPTION

The visionary and futuristic designer Joe Colombo designed the Colombo lamp in 1970, on the wave of the rapid diffusion of the halogen light. The design is in fact one of the first domestic lamps to use the new type of bulb. The design of the Colombo lamp – base, chrome stem, and adjustable reflector – responds to the demands for clean shapes and technological functionality that go hand in hand with the concept and design of this great designer.

To mark its 50th anniversary, the Colombo family was updated in a modern LED dimmer version.

FEATURES

- Finish: Anodic Bronze or Black Led Dimmer

DIMENSIONS

- 9.4"W x 80.8"H
