DONUT Stool

DESCRIPTION

Donut is an outdoor stool with such a user-friendly design that you can't help smiling as soon as you see it. With its undeniable, obvious inspiration, there's very little we can add to describe its appearance. Its designer, Japanese-born Mikiya Kobayashi, was inspired by the shape of two doughnuts to create the seat of this amusing stool. A fun idea that's sure to be a great piece to add to any setting, it's certainly got flair and the "wow" factor.
