Drop

Junya Ishigami

DESCRIPTION

This transparent, sculptural object with its pure aesthetics and clear poetics, uses perspex as a means of representing and distorting space. Drop Table is produced using a combination of complex technology and the craftsman skills typical of Living Divani's industrial approach. The company has succeeded in finding a way to make this seemingly impossible design a reality.

FEATURES

- The three legs are all different, due to the different angles at which they are inserted and positioned. They are all perfectly and seamlessly integrated into the overall volume of the table.

DIMENSIONS

- D58.27" H18.9"
