EM Table

Jean Prouvé

DESCRIPTION

The EM Table was developed around 1950 for the project 'Maison Tropicale'. Adhering to the aesthetics of necessity, even the details of this table are determined by its construction. The canted legs are connected by a crossbar, illustrating the structural forces and flow of stresses in a way that is typically seen only in engineering structures.

FEATURES

- solid wood top with solid wood legs
- powder coated steel hardware
- available in natural or stained finishes

DIMENSIONS
