ENSOMBRA Umbrella

DESCRIPTION

ENSOMBRA is a designer sunshade made from a base of galvanized steel and a stainless steel thermo-lacquered shaft in white, agate grey, concrete grey, bronze, sand, black, blue-grey, wine red, orange-brown and grey-brown – you choose. The slats on the shade itself are strips of the phenolic board that you can adjust depending on the amount of light and shade you want.

This is more than just a decorative umbrella, as it creates a set of colors, lights and shades that transform your outdoor space into an idyllic spot, full of life.

QUICKSHIP OPTION: Available in White with White concrete base
