Inlay

Front

DESCRIPTION

Inlay entirely recovers the inlay technique, an ancient and precious old time tradition. Inlay is the result of an accurate processing technique, with 4 different oak colours and a black profile: a contour line separating the different faces of the texture while defining the design. The sideboard exhibits a unique asymmetrical opening and it is internally fitted with simple shelves and separators. The chest of drawers exhibits 2 drawers, fitted with 2 internal trays and a single front.

FEATURES

- The product is available in two models: a sideboard for the sitting room and a chest of drawers with 2 drawers, covered with a decoration recalling parallelepipeds crossed in space, leading to a unique 3D effect
- Inlay handles are in solid oak
- the interior of sideboard and chest of drawer is in natural oak.

DIMENSIONS

- available in a wide range of sizes and configurations
