Inmotion Hanging Unit

Neuland Industriedesign

DESCRIPTION

This new typology of storage unit represents a 3D, aesthetic and functional innovation. Usually, the storage unit side view is never considered in terms of utilization, but for juxtaposition. The collection consists of column units, base or hanging units, cupboards and sideboards. Featuring large-sized compartments, these units are divided in a functional way to receive and organise everyday objects such as books, magazines or electronic equipment. The elements can be highly customised: the open compartments as well as the rotary units and trays may feature different materials and/or colours and can be newly varied by the customer even after their purchase.

DIMENSIONS

available in a wide range of dimensions and configurations

FEATURES

- all units are made of medium-density wood fiberboard
- elements are in matt lacquered white and open pore matt black ash available
- wall-fixing is recommended with column storage units placed against the wall
- all column units have a pre-arranged blind hole
- available in a wide range of colors and finishes
