# James

Rodolfo Dordoni

## **DESCRIPTION**

The James coffee table stands out for its sculptural form: a monolith in Liquorice-lacquered ash or in mirror-finished polished steel.

In the version with mirror finish, its eclectic identity makes it not only a multifunctional piece of furniture but also an object/sculpture to be admired in the home environment.

James not only has a strong aesthetic image of its own, but also the ability to conceal and transform itself in the living area thanks to its mirror finish.

A coffee table/jewel that can be easily and interestingly combined with all the upholstered furniture and accessories of the various collections, adding a sparkle to the space like an unexpected point of light.

## **FEATURES**
