# Keypiece Communication Desk

EOOS

## **DESCRIPTION**

Space-saving and cost-effective: the Keypiece Communication Desk is a personal workplace and meeting room table in one. Working – whether alone or in a team, advising, discussing and modern video conferencing: the design conforms to today's leadership culture. The common feature: the soft forms and curves of the desk op.

Newly introduced are solid wood legs and matching veneers. Additionally, the veneer surfaces are finished with beautifully soft, rounded edges. Especially at the wooden table, incredibly tactile, the soft-touch finish provides a sensual experience.

Whether you are working sitting down or standing up: just press the button on the touchpad for the simple and individual operation of the height adjustment feature with an electric motor. Ergonomic and remarkable, dynamic and variable. Container and Media Hub provide space for modern media and personal tools. For leadership in perfection.

## **FEATURES**

- A height-adjustable panel leg option is available
- Extension tables without adjustable height can be swiveled +/-30° around the attachment point
- Two types of edge are available:  
MDF core with chamfered edge and MDF tabletop with a gently flowing edge.

## **DIMENSIONS**

- Available in different dimensions and configurations.
