Ladder

Charlie Styrbjörn Nilsson

DESCRIPTION

With LADDER , Charlie Styrbjörn Nilsson has used the technique of steam bent wood to create a ladder for interior use whose solid wood gives strength to a slender and light structure where the rungs, that have a rounded line on one side, follow one another in a mirror-like way, defining the direction of the ascent. Ladder is a versatile accessory, which can revamp a room with its unexpected presence, lending itself to many uses both in the living area and in the bedroom. It is a support point where various accessories can be hung or applied, a decorative element with a practical side.

FEATURES

- steam-bent beech-wood
- available in three sizes
- available in natural, black, or white

DIMENSIONS
