Melt Mini

Luc Ramael

DESCRIPTION

With MELT, our experiments in the technologically advanced field of vacuum metallisation takes on a new twist. MELT Copper is a distorted lighting globe born from our collaboration with Swedish radical design collective FRONT.

The light bouncing and reflecting around the uneven surfaces creates a dramatic melting hot blown glass effect. MELT is translucent when on and mirror finish when off. Its internal luminosity is visible in full daylight.

FEATURES

- can be hung individually or in multiples using the Pendant System
- available in gold, silver, and copper

DIMENSIONS

- 11"Diam x 10.6"H with 98.4" clear cable
