Navy Officer Chair

Jasper Morrison

DESCRIPTION

To mark the occasion of the 1006 Navy Chair's 75th Anniversary, Jasper Morrison has given the upholstered Navy Officer Collection a fresh, light and modern update – prepared to be of service for the next 75 years. First introduced in 1948. As US Navy Officers were being redeployed off Navy Warships to land based facilities, they wanted a little more comfort than the ship board 1006 Navy chair provided. The Navy Officer Chair was born a bit bigger and a bit softer. Jasper Morrison has made this classic chair relevant for today, whilst remaining true to its original look, character and material – recycled aluminum.

Updates include: Proportions – refined shape/height and frame structure; The lower curve of the backrest has been straightened; Upholstery – slimmer profile of seat upholstery, H-stretcher removed.

FEATURES

- made of recycled aluminum
- frame in brushed or polished aluminum
- upholstered in Black leatherette (other materials available upon request)
- also available with swivel base
