Norma Sideboard

DESCRIPTION

Elegant, minimalist, and refined style features in the Norma sideboard. The smart, sleek design has a very modern, refined appeal.

Surface continuity is one of Norma's most important features. This is where we got the idea of wrapping the entire structure with one continuous panel, which creates a luxurious monolithic effect. Following this creative direction is the lack of handles or grips, replaced here by an elegantly simple push-to-open system.

With a host of different finishes for the base and choice of high gloss and matt lacquered colors, wood, glass, and mirrored finishes as well as the original natural slate finish, the unit changes appearance according to individual preferences.
