Pascal

Piero Lissoni

DESCRIPTION

The new Pascal system of tables represents the perfect synthesis of structural quality and project content. Pascal is distinguished by the visual lightness of its die-cast aluminum wing-shaped legs which is connected without interruption with the horizontal supporting structure on which the top rests, available in a variety of materials, creating an interplay of superimpositions and double thickness. Produced by the industrial soul that has enabled the attainment of unprecedented lengths, it is at the same time a sculptural piece of a plastic nature which modulates its look to adapt to the most diverse uses. Rigorous and essential for the office, elegant and seductive for contract, but also a master key for the home, with its ability to match its Iron painted metal leg with a top in solid wood, marble or ceramic.
