# Pilotis

Rodolfo Dordoni

## DESCRIPTION

An element conceived as a solid volume of pure geometry, Pilotis - designed by Rodolfo Dordoni - lights up with metallic glints and turns into an original showpiece when placed in the living room, or other interior areas.

Its name refers to one of the distinctive architectural elements of Rationalism, and indicates the slender columns on which the airy volume of the Rationalist buildings would lie.

## DIMENSIONS

Ø10 5/8" x 17 3/4"H
