

minima

Prince Armchair

Rodolfo Dordoni

DESCRIPTION

The Prince features the latest technology and the most innovative materials in shapes that are reminiscent of the classic design tradition of the 50's. A particularly complex design process gives rise to a die-cast aluminum base, a shape with changing lines and thicknesses producing an industrial design element whose aesthetics are similar to a sculpture. This creates an intriguing juxtaposition with the harmonious shape of the seat, a fine line softened by the down padding.

FEATURES

- upholstery available in a range of fabrics, leathers and Shearling Sheep

DIMENSIONS
