Pyrite

Boris Klimek

DESCRIPTION

The sculptural structures of minerals and their perfectly smooth surfaces are among the most precious treasures from the very core of the Earth, only revealing their optical magic once they encounter a source of light. This collection was inspired by pyrite, the golden fire-stone in the shape of a perfect cube, while the silver version of the shade reflects its inspiration in salt crystals. By blowing a molten organic substance into a precise cold form, the skilled hands of our glassmakers create a unique light fixture of elemental, yet perfect shape. The gleaming surface of this hand-blown crystal cube is enclosed from three sides by a polished metal component in either silver or gold tones. The Pyrite Collection excels in both exceptional design and top-quality materials. Easily combined, it invites you to create your own unique lighting constellations.
