# Saddle Chair

EOOS

## **DESCRIPTION**

An example of precise craftsmanship, classically austere but at the same time exceptionally comfortable – the Saddle Chair by EOOS. Once designed as Coco Chair for Italian manufacturer Matteo Grassi, Walter K. is reissuing the legendary chair made of saddle leather. With improved seating comfort and new dimensions and proportions. A continuous leather robe envelops the frame. Flowing lines, elaborately polished edges and precise seams define the shape. The outstanding seating pleasure is the result of taut belts in the seat.

In the very best of the company: barstool and standard stool extend the Saddle Chair range. They follow the design concept of the elegance of resolute shapes: the leather pieces are cut, edges polished and dyed, and seams drawn with great precision. The taut upholstering underlines the impression of clear finesse. For relaxed sitting at a table or bar.
