Solid

Rodolfo Dordoni

DESCRIPTION

Developed starting from a simple square volume, the Solid family of complements reveals great versatility through its minimal shapes.

The Solid family hosts elements with different shapes and functions. With their square forms and cubist style, their bold personality adds a distinctive touch of flair to residential and Hospitality interiors.

They range from the parallelepiped volume, which is tall enough to be set alongside a dining table as an additional seat, to coffee tables for holding or storing objects, and nightstands for the sleeping area. The rich ensemble is completed by the console table, which sits on metal blade-like legs with a Black-Nickel finish.

Some Solid coffee tables are equipped with drawers, featuring a open Moka oak and a push & pull opening system. Coffee tables that prove useful storage solutions, featuring drawers with a perfect, minimal aesthetic that almost makes them imperceptible.
