Twin Sconce

SkLO

DESCRIPTION

The *twin* sconce is a handblown glass diffuser made up of two flattened spherical shapes in two colors (one white, one off-white) which are melded together while hot on the glass blower's pipes. The glass is held to a solid brass plate canopy by a brass band which sits between the two spheres. Each sphere is lit from within by two light bulbs, one in each sphere. The *twin* sconce is designed to meet ADA requirements for commercial use in public spaces by always measuring less than 4" total depth from a wall surface.

DIMENSIONS

H 11" x W 6" x D 3.9"

FEATURES

- two glass colors available
- standard metal finishes are dark oxidized / brushed brass (other finishes available on request)
- brass canopy
