# Wings Bed

Jaime Hayon

## **DESCRIPTION**

Sweet dreams come easily on wings...

The tiltable side wings of the Wings Bed are at the heart of an interplay between intimacy and openness. They cradle the person sleeping like a cocoon, or open up to transform the bedroom into a place where people wish to spend time – and not just at night. Leather covered nightstands and adjustable LED reading spotlights are carried by a slender, textured powder coated frame finished in black.
